- Dental Implants
- Prosthodontics
- Advanced Restorative & Cosmetic Dentistry

Dr Sachin Varma
(Specialist in Prosthodontics)

BDS, MClintDent, MFDS RCS (Eng), MRD RCS (Edin)

I am a registered Specialist with the General Dental Council (GDC) in Prosthodontics, and I was awarded the MRD at the Royal College of Surgeons in Edinburgh. I also obtained a Masters of Clinical Dentistry at King's College London, where I still play an active role in training undergraduate and postgraduate dentists. My clinical work has been reviewed and assessed by world leaders in restorative dentistry at Guy's Hospital.

I know it can sometimes be difficult to refer a patient out of the practice as some patients don't actually like this! Rest assured, if you only need some advice on their options then please just call; I would be more than happy to help. Naturally, and it goes without saying, any patients that are seen at our practice will be returned back into your general dental care and I will not undertake any additional work, only what is necessary from your patient's referral; they will remain in your care.

I have successfully been placing implants at CrownWood and ensure every care and detail is considered and discussed with your patients throughout every phase of their dental treatment here.

I believe whole heartedly that this is extremely important for us to work together on such referrals and you have that peace of mind too.

I am happy to accept referrals for fixed and removable prosthodontics including dental implants.

- Facial Rejuvenation
- IV Sedation

Dr Aman Ruprah

BDS (Lond), MFDS RCS (Edin)

I qualified from Guy's, King's and St. Thomas' Dental Institute. I completed my vocational training in Camberley within the Kent, Surrey and Sussex Deanery. In September 2008 I joined the team here at CrownWood Dental Practice where I am able to apply my skills across the full range of treatments including restorative dentistry, aesthetic dentistry, veneers, crowns, bridgework and tooth coloured fillings.

I am a member of the British Society of Restorative Dentistry and the British Society of Occlusal Studies. I am committed to postgraduate education and have gained the diploma of the Membership of the Faculty of Dental Surgeons at the Royal College of Surgeons in Edinburgh.

I have completed the SAAD course in Conscious Sedation and I am currently accepting patients who are anxious/phobic for dental treatment under IV sedation.

Facial Aesthetics

I have had extensive training in non-surgical facial aesthetics and wrinkle corrective treatments for frown lines, glabella lines and crows feet using the very latest products and techniques. I am constantly combining science and art to produce natural harmonious results.

My aim is to offer a bespoke high quality service to all referred patients and I look forward to being of service to you and your patients.

- Oral Surgery
- IV Sedation

Dr Olumide Ojo

BDS, MFDS RCS (Lond)

I gained my BDS with a Distinction in Restorative Dentistry from the University of Newcastle.

My vocational training was completed in Seaham; County Durham. I then moved into hospital practice as an SHO in the Oral & Maxillofacial Surgery Department at Lincoln County Hospital. Here I trained under four Maxillofacial Consultants, learning complex oral surgery procedures, such as removal of wisdom and impacted teeth and the plating of broken jaws.

I transferred my skills into General Dental Practice, and joined the team here at CrownWood in August 2007. I am currently accepting referrals for cosmetic and restorative cases as well as treating complicated oral surgery cases.

I am happy to accept patients who require surgical extractions who are medically fit. I have completed the SAAD course in Conscious Sedation, and can offer this to help relax any anxious patients who require any dental treatment.

I feel that I have the necessary skills, training, and equipment to offer my services as an In-House Oral Surgeon to help you with those difficult cases that may have otherwise required a hospital referral.

All patients will be fully assessed and informed of all treatment options, and referred back to you with a full letter covering all treatments carried out. I hope that I can be of service to you and your patients.

- Endodontics

Dr Pavan Gogna

*BDS (Hons), MJDF RCS (Lond),
Cert Endo.*

I achieved my BDS from Guy's Hospital with Honours, which then allowed me to achieve my vocational training in Chingford; London, under the watchful eye of Dr Raj Gogna (no relation), who is a leading Specialist in Prosthodontics.

Under his guide I assisted in many smile makeover cases and implant placements, and it was then that I realised dentistry was more than just 'drilling and filling' - it can actually change peoples' lives.

Upon completion of my VT year, I worked at a fully private practice in Reading and after attending many courses I soon realised I wanted to focus more in Endodontics and so decided to begin a certificated course in Endodontics at the renowned Eastman's Dental Institute in London. Working alongside some of the best Endodontists in the UK, my studies were designed to help me on my pathway to becoming an expert in Root Canal Therapy.

Having successfully completed this course, I also became one of the first members of the Membership of the Joint Dental Faculties; a learning faculty designed to increase professional and dental skill.

All my Endodontic treatments are performed under a rubber dam, and using a surgically operated microscope.

All dental files are single use as stipulated by the Department of Health.

- Oral Surgery
- Dental Implants

Dr Michael Amin
*(Consultant Oral & Maxillofacial
 Surgeon & Specialist in Oral Surgery)*

*BDS (Hons), FDSRCS (Eng),
 FRCS (OMFS)*

I qualified in Dentistry in 1988 and in Medicine in 1996, followed by Postgraduate training in Acute Medicine, Orthopaedics and General Surgery.

I passed the Surgical Fellowship in 1998 and undertook higher surgical training in Oral & Maxillofacial Surgery, working at University College Hospital, Great Ormond Street Hospital and the Eastman Dental Hospital.

I am on the Specialist Register for both Oral Surgery and Oral & Maxillofacial Surgery and have been a Consultant at Heatherwood & Wexham Park Hospitals NHS Foundation Trust since September 2004.

I work closely with ENT Surgeons, Oncologists and other support staff in treating patients with mouth, jaw and neck cancer including surgical reconstruction and rehabilitation with dental implants and prostheses.

My other interests include facial trauma, salivary gland disease, jaw joint problems, dento-alveolar surgery (impacted wisdom teeth, buried roots and jaw cysts) and chronic facial pain.

I am delighted to be able to join the team at CrownWood Dental Practice, Bracknell in providing Oral Surgery and Dental Implants.

- Oral Surgery
- Facial Rejuvenation

Dr Caroline Mills
*(Consultant Oral & Maxillofacial
 Surgeon & Specialist Facial
 Plastic Surgeon)*

*FRCS (OMFS), FRCS (Eng),
 FDS (Eng)*

Caroline Mills is a fully accredited Consultant in Oral and Maxillofacial Surgery. She holds substantive NHS posts at Wexham Park and Northwick Park Hospitals. Privately she works in Berkshire and in Central London and is recognised by all major insurance companies.

Caroline has a special interest in all aspects of facial cosmetic and facial rejuvenation surgery, facial deformity, corrective jaw surgery and facial trauma. She also has extensive experience in all other aspects of surgery of the head and neck including salivary gland disease, facial reconstruction, secondary surgical management of patients with cleft-lip and palate and oral surgery; including dental implants and bone grafting.

Caroline first trained in dentistry and then medicine before obtaining the FRCS in general surgery. Her higher training was in Oral and Maxillofacial Surgery at St George's Hospital, University College Hospital, Great Ormond Street Hospital and North West London Hospitals. After completion of training, she underwent a six month fellowship in Cranio-Facial Surgery at Great Ormond Street Hospital for Children.

Her cosmetic fellowship and training was undertaken at the nationally renowned Institute of Cosmetic and Reconstructive Surgery at The West London Clinic with a number of leading plastic surgeons. She has a wide experience in all aspects of cosmetic facial surgery including face lifting, eyelid and brow surgery, nose reshaping (rhinoplasty), chin and jaw surgery including the use of implants and genioplasty techniques and facial implants.

She also has many years experience in the use of and teaching of non-surgical rejuvenation techniques including the use of botulinum toxin, dermal fillers and skin peels, which are increasingly becoming very popular.
