

# The Thames Valley Dental Referral Centre

# Introducing our practice to you

CrownWood Dental & MediSpa is an independent referral centre that welcomes dentist referrals across the range of specialisms including Endodontics, Restorative, Prosthodontics, Periodontics, Oral Surgery, Dental Implants and IV Sedation. In addition; we also have a CBCT Scanning Service available for advanced diagnosis and treatment planning of complex implant and restorative cases, as well as for Surgical and Endodontic planning.

We are here to help patients not only in Bracknell, but throughout the Thames Valley area including Ascot, Bagshot, Reading, Sandhurst, Crowthorne, Windsor, Wokingham and more.

With our highly experienced team of Specialist Clinicians and Dentists with Special Interests (DwSI), you can refer your patients with confidence, knowing that they will be looked after with a dedicated dental expert who will guide your patients every step of the way during their treatment.

With many specialists in our team, we are proud to be regarded as a centre of clinical excellence and together with a high standard of service, ensures your patients receive the best clinical and patient centred care they deserve.

Please contact us with any questions. Thank you for taking the time to read this and allowing me the opportunity to introduce CrownWood Referral Services to you and your valued patients.

**Dr Chi-Yuen Wong**

Principal and General Dentist

"We have been referring our patients to CrownWood Dental for some years now via the NHS referral pathway. We have to say that we have grown a great relationship with all the staff, we have found their service both reliable and extremely professional. The patients we have referred have always received a prompt appointment and have also been very happy with the treatment they received. Thank you."

**Angela Debley - Regional Manager, Perfect Smile**

"I have been referring our patients to CrownWood for Oral Surgery and Implant treatments for a number of years now. Our patients have always been seen promptly, and received a high level of care."

The communication between Crownwood, the patient and our practice is of a gold standard. I will continue to use Crownwood and would highly recommend the practice to other referring dentists."

**Dr Bob To - Deepfield Dental Practice**

## Our Referral Promises

### A Partnership in Dental Care

At CrownWood Dental & MediSpa, we are committed to involving you in the care we provide. When referring your patients to us, you can be assured that for every referral, we will:

- Contact your patient without delay and see them at their earliest convenience.
- Discuss all treatment options with your patient; keeping you informed every step of the way.
- Provide your patient with comprehensive treatment plans and estimates for each suggested treatment option.
- Carry out only the specialist treatment for which you have referred your patient.
- Keep you informed of changes or additions to your patient's treatment plan.
- We welcome your involvement in the care we provide for your patients.

Importantly, we will return your patient to you to resume their routine dental care following their treatment with us.

# Your patients' journey with us

## 8 key steps

**1**

In your referral, outline the treatment you wish to be carried out and include any wet or printed radiographs. You can send our referral cards free post or you can email directly to us if digital radiographs are used.

**2**

Once our team receive your referral, a letter or email will be sent to you confirming receipt of your referral

**3**

Your patient will be contacted using details provided and a consultation appointment made. A welcome pack is then sent out.

**4**

At the consultation appointment, your patient is greeted by our warm and welcoming staff. A full assessment is undertaken, including all necessary tests and radiographs, with details of treatment and a written estimate (with consent) provided.

**5**

A letter is sent to you with full details of the consultation including the treatment recommended. If treatment cannot be provided then any original radiographs are sent back with this letter and the patient returns to your care.

**6**

If treatment can be carried out, the patient will then return to see us and all necessary treatment will be performed. A completion letter is sent back to you with any additional information.

**7**

Post completion, a Review is carried out after 1 week (if applicable) to check for any clinical issues and answering any further patient questions.

**8**

A further Review after 1 year, and after subsequent years, are also highly recommended. These Reviews however, are not included in the treatment cost.

## Dr Raji Ranganathan

BDS, MDS DNB, MOMS RCPS, MFDS RCS

Specialist in Oral Surgery (Locum Consultant in Oral Surgery)

GDC Registration 100849

**Raji qualified as a dentist in 1996 and is a Registered Specialist with the GDC in Oral Surgery. She completed her Masters in Oral Surgery in 2001. She was awarded the Diplome in National Boards in Oral Surgery & Maxillofacial Surgery by the Directorate of Health, New Delhi in 2003. Raji is also an examiner for Postgraduate Diploma conducted by Royal College of Surgeons.**

Providing specialist oral surgery services in practices throughout the South East, Raji specialises in the sympathetic treatment of nervous patients who find her very considerate and very gentle. As a Locum Consultant in Oral Surgery at Royal South Hants Hospital, Southampton, Raji does procedures under both Oral and IV Sedation for nervous and medically compromised patients.

Her diverse experience also includes complex patient management in Primary Care hospitals as well as chairside teaching at King's College, London.

Raji's approach to providing the very best patient care is to listen and discuss any issues with patients before treatment is carried out, making sure patients are relaxed.

### Special Interests

- Oral Surgery
- Maxillofacial Surgery
- IV Sedation for nervous & phobic patients

### Memberships & Qualifications

- Registered Specialist with General Dental Council (GDC) in Oral Surgery
- Royal College of Physicians & Surgeons of Glasgow in Oral & Maxillofacial Surgery
- Faculty of Dental Surgery awarded by the Royal College of Surgeons, England

## Dr Raman Bhardwaj

BDS (Bris), MFDS RCS (Eng), MClinDent (Perio), MPerio RCS (Ed)

Specialist in Periodontics

GDC Registration 85724

**Raman graduated from Bristol Dental School in 2005. After completing his vocational training, he worked as a Senior House Officer in Oral Surgery, Restorative Dentistry and Periodontics at various institutions including Bart's and the London School of Medicine & Dentistry and Birmingham Dental Hospital.**

As a Specialist in Periodontics, Raman's treatments include the non-surgical and surgical management of gum disease, mucogingival surgery for treatment of gum recession, crown lengthening surgery, periodontal regeneration, the placement of dental implants and treatment of implant complications.

Raman has a very calm and patient manner and listens to patients' concerns, ensuring they are fully informed of the treatment plan and their options.

In his spare time, Raman loves to travel and enjoys climbing mountains

### Special Interests

- Periodontics
- Mucogingival Surgery (correcting the effects of gum recession)
- Crown Lengthening Surgery
- Dental Implants
- All-on-4/Teeth in a Day

### Memberships & Qualifications

- GDC Registered Specialist in Periodontics
- Master of Clinical Dentistry in Periodontics (following 4 years specialist training at King's College, London)
- Membership in Periodontics at the Royal College of Surgeons (Edinburgh)
- Faculty of Dental Surgery awarded by the Royal College of Surgeons, England

## Dr Rupinder Reel

BDS Hons (Liverpool), FDS RCS MRD RCS Eng

Specialist Endodontist

GDC Registration 73329

**Rupi qualified as a dentist at Liverpool University in 1997. She gained experience working in both general dental practice and hospital environments, developing expertise in Oral and Maxillofacial Surgery.**

In 2003, Rupinder attended Guy's Hospital for postgraduate training in Endodontics and since qualifying as MRD RCS (Eng), she has specialised in Root Canal Treatment.

Rupi has a very open and engaging personal style and she prides herself on providing the very highest standards of care and attention in addition to clinical excellence.

In her spare time, Rupinder enjoys cooking, travelling and spending time with her family.

### Special Interests

- Endodontics

### Memberships & Qualifications

- Membership of Restorative Dentistry at Royal College of Surgeons (2003)
- GDC Registered Specialist Endodontist (since 2007)
- Faculty of Dental Surgeons at Royal College of Surgeons

## Dr Pavan Gogna

BDS Hons (KCL), MJDF RCS (Lond), Dip Endo (UCL)

Special Interest in Endodontics

GDC Registration 82478

**Pavan qualified as a dentist in 2003 from Guy's Hospital with Honours, which then allowed him to complete his vocational training in Chingford under the watchful eye of Dr Raj Gogna (no relation), who is a leading Specialist in Prosthodontics.**

Following completion of his VT year, Pavan attended numerous courses and developed a keen, special interest in Root Canal Treatment (Endodontics). He has been accepting referrals for over 8 years. He particularly enjoys performing Root Canal Treatment because it is so detailed and because it means he can help save patients' teeth. He uses state-of-the-art technology and equipment to include a dental operating microscope, the latest filling techniques and sedation for anxious patients.

Pavan's approach is that no case is considered too small and he is always on hand to speak to any dentist considering referring and to offer any helpful advice to them. Pavan also welcomes referring dentists to accompany their patients if they have a special interest in their case. In his spare time, Pavan loves playing a variety of sports, especially football. Socialising with friends and family is very important too, and Pavan also enjoys reading.

### Special Interests

- Endodontics (Root Canal Therapy)
- IV Sedation for nervous & phobic patients

### Memberships & Qualifications

- Diploma in Postgraduate Endodontics at Eastman Dental Institute, London
- Membership of the Joint Dental Faculties at Royal College of Surgeons
- Postgraduate Diploma Endodontics at University College London (UCL)

## Dr Aman Ruprah

BDS, MFDS RCS (Edin)

Dental Implants, Facial Aesthetics & IV Sedation

GDC Registration 114776

**Aman qualified from Guy's, King's & St Thomas' Dental Institute in 2008. He is committed to postgraduate education and has completed all the examinations required to become a member of the Faculty of Dental Surgeons (MFDS).**

He applies his skills across a wide range of treatments and has special interests in aesthetic advancement procedures and facial aesthetics for wrinkles and frown lines. Aman is adept at providing an extensive range of non-surgical facial aesthetic procedures using renowned and safe products such as Azzalure® and Restylane®.

To further his special interest in treating anxious patients, Aman had formal training from SAAD. He uses IV Sedation and Oral Sedation as a combination for needle-phobic patients and always receives excellent feedback from patients. Aman is happy to offer his clinical services to both your patients and clinical staff.

Away from the practice, Aman is a keen motorcyclist and enjoys playing snooker and going to the gym.

### Special Interests

- Dental Implants
- Restorative dentistry
- Facial Aesthetics
- IV Sedation for nervous & phobic patients
- All-on-4/Teeth in a Day

### Memberships & Qualifications

- British Society of Restorative Dentistry
- British Society of Occlusal Studies
- Faculty of Dental Surgeons (MFDS)
- Society for the Advancement of Anaesthesia in Dentistry (SAAD)
- Certificate in Implantology (1 year course) from Tipton Dental Training Academy, London

## Dr Emanuele Clozza

Special Interest in Dental Implants

GDC Registration 253700

**Before moving to the UK, Emanuele qualified as a dentist in Italy and earned a Doctor of Dental Surgery qualification at the University of Trieste before going to the USA to continue his post-graduate education at the prestigious New York University.**

Emanuele has placed and restored more than 11,000 implants and completed more than 800 full arch restorations, and cases range from single tooth implants to a variety of treatments for patients with many damaged or missing teeth. His experience has led to being invited to present at international dental conferences and Emanuele has had more than 20 scientific articles published in respected dental journals.

His primary areas of interest are the All-on-4 or "Teeth in a Day" treatments, dental implants in the aesthetic zone, gum grafting and bone regeneration. Emanuele's patients have included TV presenters, 'celebrities', sports personalities and overseas visitors.

### Special Interests

- Dental Implants
- All-on-4/Teeth in a Day
- Full arch restorations
- Bone grafting
- Sinus elevation
- IV Sedation for nervous patients

### Memberships & Qualifications

- Doctor of Dental Surgery
- International Dentists in Comprehensive Dentistry Advanced Programme (1 year)
- Periodontics Advanced Education Programme (3 years)

IV Sedation	£375
Facial Aesthetics	from £180

# Advanced diagnosis for complex procedures & patient care

## The Sirona Orthophos CBCT scanner

CrownWood Dental & MediSpa referring dentists a leading edge CBCT scanner, the Sirona Orthophos 3D SL26. This offers you a wealth of 3D information and high definition imaging to support your case planning without the need to invest in additional technology.

### What is it for?

These X-ray images help towards the diagnosis, treatment planning and follow up of patients with conditions affecting the head, face, teeth and jaw. A CBCT scan is invaluable for the more complicated procedures such as Endodontics, Oral Surgery and Prosthodontics, including complex implant cases.

## What does it do?

Whenever a 3D image is required we are able to take the scan in our X-ray room. The procedure is quick and easy for your patient.

Some important features:

- Sharp layer technology automatically adapts the panoramic curve to the patient's individual anatomical features, ensuring that the entire jaw is always in the sharp layer.
- DCS (Direct Conversion Sensor) technology converts X-rays directly into electrical signals, with no information loss due to light conversion.
- Several hundred individual images are produced with the 3D X-ray in the space of just a few seconds. Using this data, the software generates a 3D image of the jaw section. A "virtual tour" of the scan means the data can be assessed from every dimension.
- The scan is sent to you by secure email, the same day ready for you to use for accurate diagnosis, treatment planning and to discuss the treatment in detail with your patient at their next appointment. Alternatively, a disk is also given to your patient for you to use at your review appointment with them.

## Clinician & patient Benefits

- More accurate case planning
- Razor-sharp, high-contrast panoramic X-ray images of exceptional quality
- Improved success rates with your procedures
- Consultations are more accessible and understandable for patients
- Safer - low dose 3D imaging at 2D dosage levels
